# ENHANCEMENTS AND REPAIRS

## Pinnacle Series

### Browser Admin and Management Utility

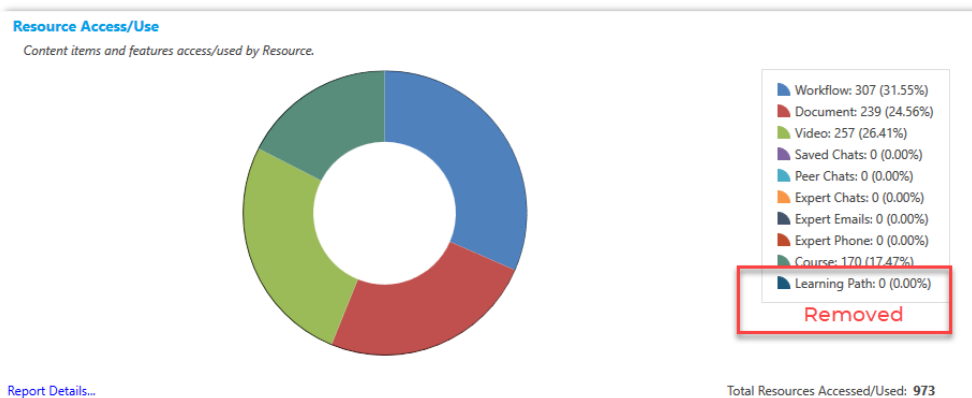

The Administration Portal for Pinnacle Series allows your administrators to manage users and groups through a browser portal.

The Pinnacle Series Management utility is a Desktop Application that is required for Pinnacle Series Administrators and Managers to set up, configure, and maintain the Pinnacle Series Platform.

## Repairs:

- ✓ **ASP.NET version disclosure.**
  - The HTTP responses returned by this web application included a header named X-AspNet-Version. The value of this header is used by Visual Studio to determine which version of ASP.NET is in use. It is not necessary for production sites and has been disabled.
- ✓ **Usage Reports**
  - We updated the logic in the Usage Reports > Resource Access/Used tool, removing misleading 0% Learning Path charts.

## Work Groups

Work Groups Owners can manage notifications within the settings area of each work group.

### Repair:

#### ✓ **Work Group Notifications**

- Work group notifications will be toggled off as default.

## Live Events

Pinnacle Series Users can use the live event calendar within the browser to register for live events, track live event registrations and view a historical live event. The color legend allows users to easily distinguish and filter live events they have self-registered for, those that have been assigned to them, and those that they were invited to. We now offer two additional filters to distinguish external and internal live events.

### Enhancement:

#### ✓ **New Live Event Filters (Internal and External)**

- We added the ability to filter Live Events in the Pinnacle Series End User portal so they can filter by Internal and External.

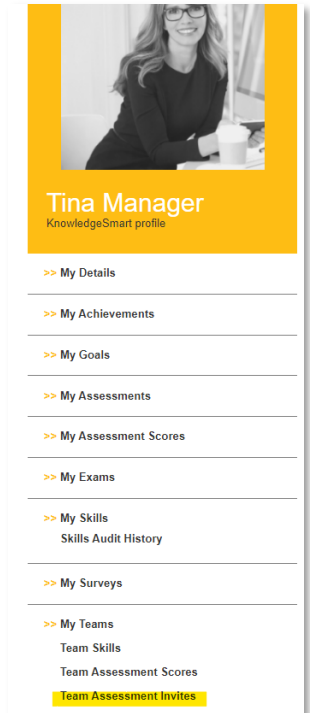

# KnowledgeSmart

## KnowledgeSmart

### Enhancements:

- ✓ **Manager Profile – Visibility of invite history**
  - We added a new Invites > History area in Manager’s User pages. This allows Team Managers to filter invites by the following status: Not Started, In Progress, Completed, Pending.
  - Go to My Teams > Team Assessment Invites
  - Use the filter options to view invites with different statuses. Export invites using the ‘Export Invites to Excel’ tool.

### >> Team Assessment Invites

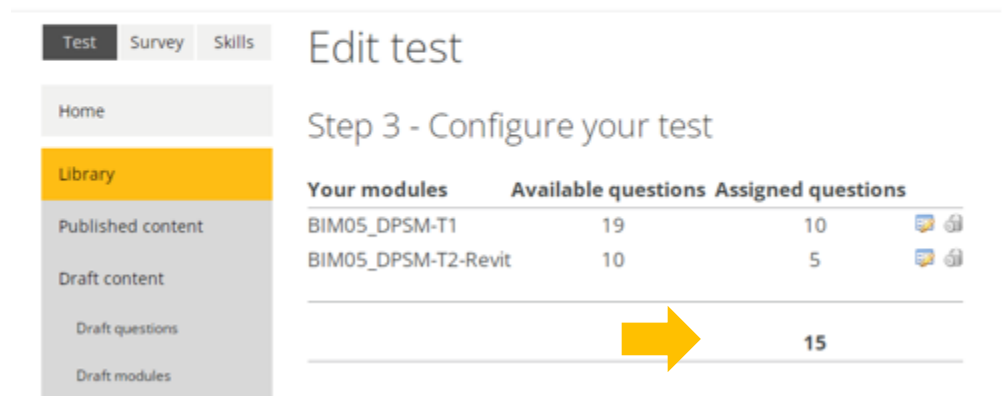

Not Started
  In Progress
  Pending
  Completed

Total invites: 3 Export Invites to Excel

KS Username	First name	Last name	Email	Test	Sent Date	Status
BrendanBuilding	Brendan	Building	brendan@knowledgesmart.net	AutoCAD 2D - Xpress 2023 (18960)	21 Apr 2023	Not Started
AnnieArchitect	Annie	Architect	annie@knowledgesmart.net	AutoCAD 2D - Xpress 2023 (18960)	21 Apr 2023	Not Started
DinaDesign	Dina	Design	dina@knowledgesmart.net	AutoCAD 2D - Xpress 2023 (18960)	13 Mar 2023	In Progress

✓ **Library Enhancement**

- We added a new sum total for 'Assigned questions' on the Draft content > Draft test > Step 3 (Configure your test) page. This allows admins to see at-a-glance how many questions have been assigned overall in an assessment.

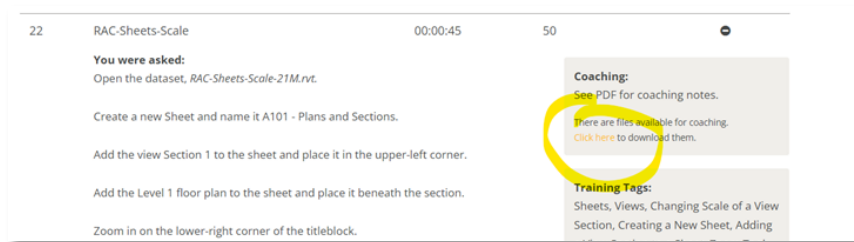

The screenshot shows the 'Edit test' page for 'Step 3 - Configure your test'. On the left is a navigation menu with 'Library' selected. The main area contains a table with the following data:

Your modules	Available questions	Assigned questions
BIM05_DPSM-T1	19	10
BIM05_DPSM-T2-Revit	10	5
		<b>15</b>

A yellow arrow points to the '15' in the summary row.

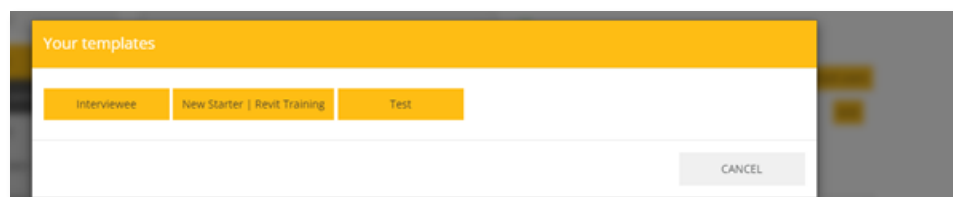

✎ Repairs:

- ✓ Bug associated with downloading coaching notes within the assessment report.

The screenshot shows an assessment report for 'RAC-Sheets-Scale' with a duration of 00:00:45 and a score of 50. Under the 'Coaching' section, there is a link to download coaching notes: 'Click here to download them.' A yellow circle highlights this link.

- ✓ We fixed an issue which prevented invite templates being selectable on the Assessment Invites page of the KS admin dashboard.

The screenshot shows the 'Your templates' section of the admin dashboard. It contains three buttons: 'Interviewee', 'New Starter | Revit Training', and 'Test'. A 'CANCEL' button is visible at the bottom right.
