ENHANCEMENTS AND REPAIRS

Pinnacle Series

Management Utility

The Pinnacle Series Management Utility serves as a flexible tool crafted to simplify diverse facets of platform administration and configuration. User Administration functionalities are conveniently accessible through the browser admin, while the management utility provides a centralized hub for tasks such as content management, learning/assessment assignments, and reporting.

Repairs

✓ **Manage Content – HTML Documents**

○ **Observed behavior**

- If an attempt was made to update an existing HTML document via the 'Modify' function at the file uploaded in the Manage Content > Documents folder, the HTML was rendered blank upon completion of the modification process.
- When a file is imported as new from the same folder, it works fine. So, the issue seems to be in the upload process.
- Confirmed a bug when adding a new HTML document via drag and drop or when attempting to overwrite files (import, drag and drop, or upload from the document itself). The updated file was only uploading 1st level subfolders, but not folders deeper nested.

- **Repair:** HTML Documents can now be updated and saved as expected.

✓ **Auto Enrollments not working for Org that has migrated AD Sync from On-Prem to Azure AD**

- **Observed behavior** - Since migrating AD syncing to Azure AD an organization's previous Auto-Enrollments were not being assigned to new employees.
- **Repair:** Modified the ADSync process to look for groups associated with the users that are set up with auto-enrollments.

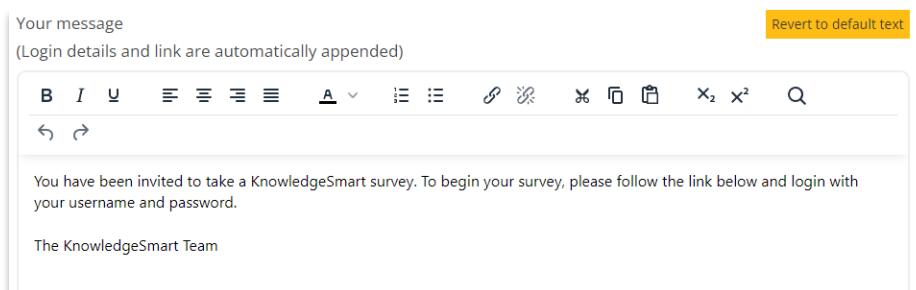

KnowledgeSmart

KnowledgeSmart

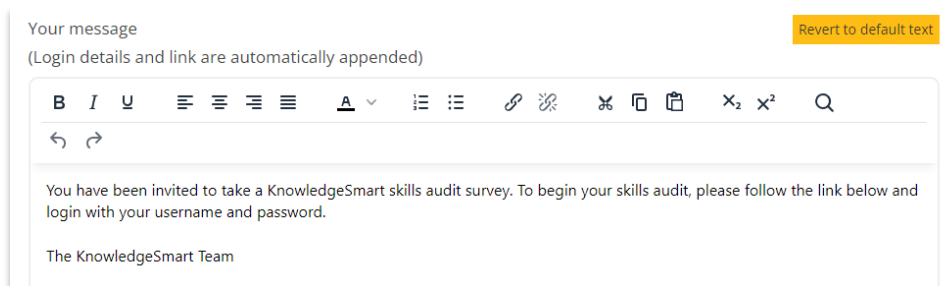

KnowledgeSmart Enhancements:

✓ Text Editing Tools

- On the survey invites page, we have the updated text editing tools:

- On the skills audit invites page, we have the updated text editing tools:

✓ Add cut-off date to surveys and skill audits

- We added a new tool which allows KS admins to disable surveys and skills audits.
- This enables admins apply a cut-off date to surveys and skills audits, on the following pages:
 - Published surveys
 - Draft surveys
 - KnowledgeSmart skills audits
 - Published skills audits
 - Draft skills audits

ID no.	Skills audit name		
1299	AEC Process		<input type="checkbox"/>
1303	AEC Project Types		<input type="checkbox"/>
1300	AEC Workflows		<input type="checkbox"/>
1492	AutoCAD Civil 3D		<input type="checkbox"/>

- If a user tries to log in to a survey or skills audit after it has been disabled, they will see an advisory message:

You're about to take a survey...

Thanks for responding to our survey invite.
To begin, please enter your User name and Password.
