Multiple choice

This question type offers a selection of possible answers – and users need to select the best one. Watch out for 'distracter' answers, which are designed to make people think before selecting their final response.

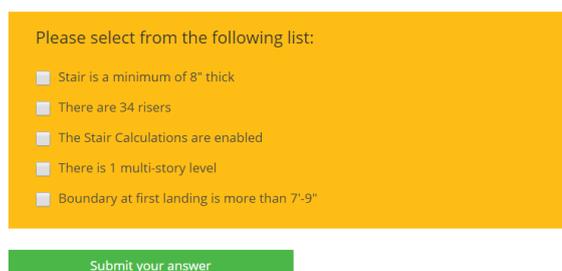

Please choose one from the following:

- Analytical Columns
- Walls
- Structural Framing
- Boundary Conditions
- Structural Connections

Submit your answer

Pick list

This question type offers users a range of options, which could represent a correct answer. Users should choose the best answers from the list provided, using the check boxes. Partial marks are awarded for entering some of the correct answers.

Please select from the following list:

- Stair is a minimum of 8" thick
- There are 34 risers
- The Stair Calculations are enabled
- There is 1 multi-story level
- Boundary at first landing is more than 7'-9"

Submit your answer

True or false

This question type is straightforward. Users must read the statement or question and decide if they think it is true or false. Enter the answer using the radio buttons.

Please select true or false:

True
 False

Submit your answer

Order list

This question type requires users to place several items in the correct sequence. They need to drag and drop the answer options until they are in the right order.

Put the following properties in order, from most general to most specific:

Drag these items into the correct order:

An Instance

A Category

A Family

A Type

Submit your answer

Matching list

This question type asks the user to correctly identify or match the relationship between two lists of data.

Drag each answer choice on the left to the most relevant box on the right. Once you have matched all options, submit your answer:

Floors	Cut Lines Color
Grids	Halftone
Structural Columns	P/S Lines Weight
Structural Framing	P/S Lines Pattern

Submit your answer

Complete the blank

This question type asks the user to fill in one (or more) blank fields, or select from a list of available options in a sentence or paragraph.

Choose the best answers from the options below:
