Welcome Text

This skills audit covers a variety of different AEC project types, including: Residential, Commercial, Leisure, Educational, Institutional, Healthcare, Energy, Transport, Industrial, Heavy, Technology and Agricultural/Horticultural.

It is not possible to edit a Skills audit from this page. To make custom changes to the KS 'off the shelf' library material, first use the **Import to your account** tool to create a duplicate copy of the Skills audit.

The copied Skills audit will have a different ID number to the original and is fully editable. Your copy will display in the **Library > Draft content > Draft skills audits** page.

(See below for notes on **Editing Skills Audits, Skills Modules and Skills Questions**).

CREATING & EDITING SKILLS AUDITS

When you import a KS Skills audit into your drafts area, the copy will be displayed in the **Library > Draft content** area of your dashboard.

Skills Audit Questions

Select the **Create question** tool, to write new Skills audit questions from scratch, and follow the same two editing steps as described below.

To edit a Skills audit question, go to the **Draft questions** page and hover your mouse over the **Edit question** button; note that a small pop-up menu appears to the left of the **Edit question** icon.

This menu allows you to skip straight to the relevant step of the edit process, depending on the change you want to make.

- Question tags
- Edit question

Edit step one

Enter the Skills audit question name, a brief description of the Skill being rated, and the question body text.

Edit skills audit question

Step 1 >> Step 2

Step 1 - Name and write your skills audit question

<p>Question name:</p> <input type="text" value="Solar Energy"/> <p>Short description of skill being rated:</p> <input type="text" value="Solar Energy"/> <p>Skills audit question text:</p> <div style="border: 1px solid #ccc; padding: 5px; min-height: 60px;"> <p>How much experience do you have working on Solar Energy projects?</p> </div> <p style="text-align: right;"> <input type="button" value="Continue"/> <input type="button" value="Save"/> </p>	<p>Summary</p> <p>Name: Solar Energy</p> <p>Question Text: How much experience do you have working on Solar Energy projects?</p> <p>Description of skill: Solar Energy</p> <p>Used In (Modules): 110295 Energy Projects</p> <p>Used In (Skills Audits): 1463 ABC Architects - Project Types</p> <p>Author: KS Skills Demo (Rory/Vance)</p> <p>Category Tags: Solar Energy</p>
---	--

Question name

Choose a name which reflects the Knowledge, Skill or Ability (KSA) which you require the User to rate. For example, 'Revit Family Creation' or 'Spanish Language - Written Skill'.

Short description of skill being rated

This short description is the Knowledge, Skill or Ability (KSA) being rated. This can be the same as the question name, or a shortened version. For example, 'Revit Family Creation' or 'Written Spanish'. Or it may be just one word. To ask about experience and knowledge with Healthcare projects the word 'Healthcare' may be enough. Ideally keep this short description to three words or fewer. NB, the skill description is also the data that will be included in **People Finder** searches.

Skills audit question text

Write a question to capture the skill of interest. It could be a direct type of question, for example, *'What is your experience and knowledge of working on projects in the Healthcare sector?'* Alternatively, you may choose to write a question which is more a reflection of the situation in which someone may find themselves. For example, *'Prior to a model being issued to the design team, you are responsible for reviewing the warnings and working through to resolve as many as possible. How experienced are you at managing reviews? How positive are you that you will be able to work through the reviews successfully?'*

When you have completed Step one, click on the orange **Continue** button to edit step two.

Edit step two

This is where you assign your meta tags, or keywords, to each question.

Edit skills audit question

Step 1 >> **Step 2**

Step 2 - Tag your skill

Category tags

Solar Energy

Training tags

Solar Energy, Renewable Energy

Finish

Summary

Name:

Solar Energy

Question Text:

How much experience do you have working on Solar Energy projects?

Description of skill:

Solar Energy

Used In (Modules):

110295 Energy Projects

Used In (Skills Audits):

1463 ABC Architects - Project Types

Author:

KS Skills Demo (RoryVance)

Category Tags:

Solar Energy

Category tags

These are tags which are used for searching, filtering and grouping questions. For example, all questions related to Revit skills could be tagged 'Revit'. Or, all questions related to language skills could be tagged 'Language'. The category tag can be any text or number which will assist you in managing your library of Skills audit questions.

Training tags

Training tags are used in the Skills audit reporting process to identify opportunities for improvement of the skill which is being rated. For example, if the question for the skill being rated is *'How would you rate your skills at using Autodesk BIM 360 in an administrator role?'* then a suitable training tag could be *'Autodesk BIM 360 Administrator'*.

When the tags have been completed click on the orange **Finish** button and the question is complete.

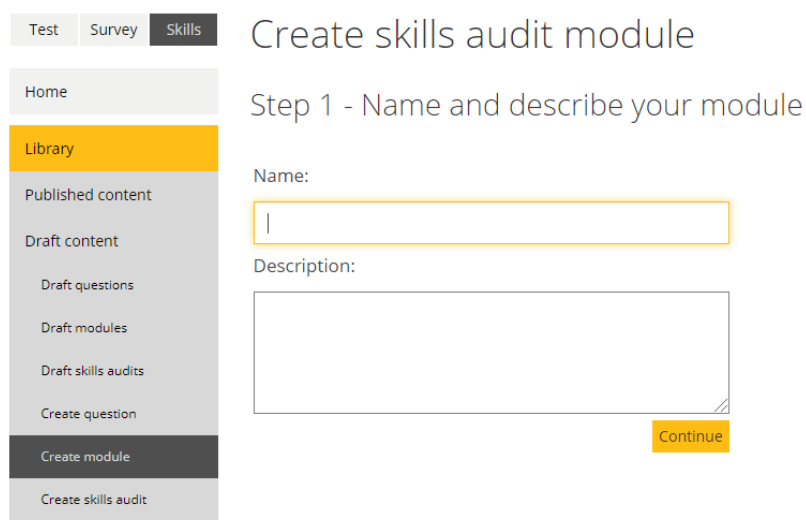

When you have finished creating or editing your Skills audit questions, you can view a complete summary of all the key elements for each question by clicking on the question name, in the **Draft questions** page.

Skills Audit Modules

A Skills audit module is a collection of Skills audit questions which have a common theme. For example, all questions relating to language skills may be grouped together in a module called 'Languages'. All questions relating to design software may be grouped in a module called 'Design and Drafting Software'.

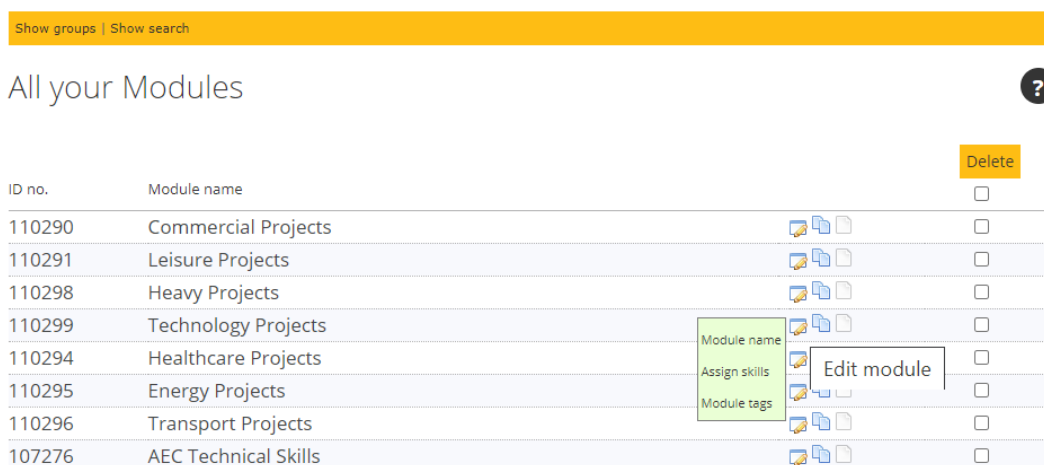

Each module displays on a separate page on the Skills audit UI.

Select the **Create module** tool, to add new Skills audit modules from scratch, and follow the same three editing steps as described below.

To edit a Skills module, go to the **Draft modules** page and hover your mouse over the **Edit module** button; note that a small pop-up menu appears to the left of the **Edit module** icon. This menu allows you to skip straight to the relevant step of the edit process, depending on the change you want to make.

Draft skills audit modules

ID no.	Module name	Actions	Delete
110290	Commercial Projects		<input type="checkbox"/>
110291	Leisure Projects		<input type="checkbox"/>
110298	Heavy Projects		<input type="checkbox"/>
110299	Technology Projects		<input type="checkbox"/>

Summary

Skills Audit Name:
ABC Architects - Project Types

Edit step three

Here, you can edit your custom Skills audit settings.

Provide a general **welcome message** and additional instructions to users, which displays on the Skills audit start page.

Edit skills audit

Step 3 - Skills audit settings

Survey welcome message/instructions

This skills audit covers a variety of different AEC project types, including: Residential, Commercial, Leisure, Educational, Institutional, Healthcare, Energy, Transport, Industrial, Heavy, Technology and Agricultural/Horticultural.

Category tags are used to help you search and group Skills audits in your library.

Category tags

AEC Project Types, Residential, Commercial, Leisure, Educational, Institutional, Healthcare, Energy, Transport, Industrial, Heavy, Technology, Agricultural/Horticultural

Use the **Learning path filter** to create a custom learning path for users, based on the logic in the drop-down boxes. The training tags associated with the Skills questions will be grouped to create a suggested list of future learning topics for each user.

When exporting training tags these filters determine which ones are included in the export. For example, if the User rating is set to 'is less than or equal to 2', in this case all training tags for skills where the User rated themselves 1 or 2 will be exported.

Learning path filter

User rating: is less than 2

Manager rating: is greater than 2

UI Options

Show Skill rating

Show Skill description

Rating descriptions

1	No / very basic	is less than	
2	Basic	is less than or equal to	

The **UI Options** settings allow you to control what displays to users on the Skills audit user interface. Either skills rating numbers only, skills descriptions only, or both together.

You can set custom skills rating descriptions for each Skills audit using the **Rating descriptions** datafields.

When answering a Skills audit question there will be a choice of 5 answers. As is usual with this type of question the lowest rating, typically 1, indicates no knowledge and experience of the skill, or perhaps very little knowledge and experience. At the other end of the scale a rating of 5 typically indicates expert or very advanced knowledge and experience. The other 3 ratings are moving along the scale from 1 to 5. These ratings are set at a Skills audit level.

The default settings for each KnowledgeSmart account are below:

1	No/Very basic
2	Basic
3	Good
4	Advanced
5	Expert

The default ratings settings are editable on an account basis, as well as on an individual Skills audit basis. It would be entirely possible for a Skills audit relating to software to have 5 ratings something like this:

- 1 No knowledge. I have never used this software.
- 2 Basic knowledge. I use this software on occasions.
- 3 Good knowledge. I use this software most days.
- 4 Advanced knowledge. This is my area of expertise.
- 5 Expert knowledge. I teach classes on this.

Click **Finish** to save your custom Skills audit setting changes.
